WHY SOCIAL ENTREPRENEURSHIP?

Social Entrepreneurship is an emerging field that offers opportunity to young professionals to create societal/economic value on a sustainable basis. Social entrepreneurs are gaining international attention motivated by the desire for change and to see the world as it can be, not as it is. The field of social entrepreneurship is the fastest growing sector and perhaps the only sector that is creating gainful employment worldwide. Social entrepreneurs' use entrepreneurship principles to build start-ups that address problems like access to education, affordable housing, micro finance, energy, food wastage, access to health care, rural tourism etc. Thus, Social entrepreneurs play a vital role in national building and towards achieving the United Nations Sustainable Development Goals 2030. This workshop aims to give the participants innovative tools for sustainable change.
